

ESTAMOS AQUÍ.

Introducing Active On-Demand de México. Now the North American leader in transportation and door-to-door management of time-sensitive freight has an office staffed 24 x 7 by people who live, work, and do business in México.

Our Strengths

The world's largest users of expedited freight services rely on Active On-Demand because we offer more carriers, more bids, and more solutions for every shipment. Here's what else to expect.

- With more carriers competing for each shipment, you'll benefit from lower prices and greater flexibility.
- Visibility. You'll see every bid. Our online procurement and management activities are performed in full view of our customers.
- Reliability. Our non-asset-based business model is backed by a fleet of controlled assets retained to provide resources for contracted customers during times of constrained capacity.

To learn more, dial toll-free from México at (800) 999-9263 or from the USA at (011-52) 449-910-6800. Or visit us online at www.activeondemand.com.

We support the world's largest shippers and manufacturers with expedited ground, air, and emergency air charter services.

We provide access to the most capacity, most bids, most options, and best available price for every shipment.

Experience Counts

Since 1996, we've managed more emergency air charter shipments than any competing expediter.

Since then, we've expanded our offerings to include over-the-road, hand-carry, and air freight expedited services. Today we provide a turnkey solution for unplanned or expedited shipments.

We've assembled the industry's most qualified group of carriers. We treat them with respect. We supply them with volume. And we provide them with the opportunity to compete for our customers' business.

The results? Greater capacity. On-time performance. Lower costs. Greater flexibility for every shipment.
